VISWANATHAN M

+91-9566578560|viswanathan23ad060@gmail.com|GitHub|Linked in|

PROFILE

Dynamic and detail-oriented individual with a strong foundation in data analysis, artificial intelligence, data visualization, and full stack web development. skilled in transforming raw data into meaningful insights using analytical and visualization techniques. possesses strong problem-solving abilities and effective public speaking skills. passionate about building data-driven solutions and pursuing a career as a data analyst, ai engineer, or data scientist, contributing to intelligent and impactful systems.

EDUCATION

Kathir College Of Engineering ,coimbatore-India

Bachelor of Technology in Artificial Intelligence &Data Science

Current CGPA: 8.5%

SKILLS

Technical: Python-Tensorflow/Keras , Scikit-learn, Matplotlib, Pytorch, Flask/FastAPI, Langchain, Huggingface Transformers, AWS, RAG , LLM APIs, Full Stack development, MERN Stack(Node.js,React), Machine learning basics, Data analysis, Dashboard Development, Business Analytics, MySQL, MongoDB, Web development.

Tools: Claude, Excel, MS-Word, VsCode , Jupyter, Git&GitHub, Linux, Versal Control, Adobe AE, Figma, Power BI ,CVAT, Super Annotate, Roboflow, Tableau, Google Colab.

CERTIFICATIONS

- Nvidia certification in artificial intelligence and data science, with knowledge of ai fundamentals, data analysis, and visualization techniques.
- Certified in Data Analytics – Vinsup Skill Academy
  Completed traininginExcel, SQL,Python,PowerBI,DataVisualization,andDataAnalysis
- UI and UX design certification, with practical experience in creating intuitive and user-centered designs using wireframing, prototyping, and usability principles.
- Digital marketing certification, with practical experience in SEO, social media marketing, and campaign analysis, enabling effective online brand promotion and audience engagement.

EXPERIENCE

- Web Development Intern at Nxt Logic Software Solutions, with hands-on experience in developing responsive web applications, working with frontend and backend technologies, and enhancing user experience through efficient interface design.
- Dashboard Development Intern at Vinsup Academy, with hands-on experience in creating Swiggy and Netflix dashboards using Power BI and Tableau for data visualization and business insights.
- Data Analyst Intern at Yuva Intern, with hands-on experience in data analysis, data preprocessing, and data visualization. Worked with datasets to identify trends and generate insights for decision-making.
- Virtual Machine Learning Intern, with hands-on experience in data preprocessing, model building, and applying machine learning algorithms to solve real-world problems.
- UI/UX Intern at Infosys Springboard, with hands-on experience in designing intuitive and user-centered interfaces using wireframing, prototyping, and usability principles.

PROJECTS EXPERIENCE

1.Stock market prediction

Stock market prediction project, developed a machine learning model to analyze historical stock data and predict future price trends. performed data preprocessing, feature selection, and model training using python. visualized stock trends and prediction results using data visualization techniques.

2. AI Salesforecasting System

AI sales forecasting system, designed and implemented a machine learning model to forecast sales trends using historical data. applied data preprocessing, feature engineering, and visualization techniques to support data-driven business decision making.

3. Eye Disease prediction

Eye disease prediction system, developed an advanced machine learning and deep learning model to accurately detect and classify various eye diseases using medical image data. performed extensive data preprocessing, image augmentation, and feature extraction to enhance model performance. implemented and trained models using modern frameworks, improving prediction accuracy and reliability. analyzed results and visualized outputs to support early diagnosis and assist in healthcare decision making.

4.Analytics and performance tracking

Analytics and performance tracking project, analyzed digital marketing campaign data using analytics tools to measure performance and identify key trends. monitored metrics such as traffic, engagement, and conversion rates to evaluate campaign effectiveness. generated reports and insights to optimize marketing strategies and improve overall performance.

5. Offline Chatbot

Offline chatbot system, developed an intelligent chatbot that works without internet access using predefined data and machine learning techniques. implemented natural language processing to understand user queries and provide relevant responses. improved user interaction by designing a simple and efficient conversational interface.

ACHIEVEMENTS

- Awarded Best Poster Presentation at various College technical and non-technical symposiums.
- Award for Excellence in 3D Image Creation at EG Graphics Webinar recognized for outstanding creativity, advanced visual design, and proficiency in 3D modeling and graphics tools.
- Award-winning participant in multiple technical webinars, recognized for excellence in AI and data analytics domains.

- Data Analytics & Business Intelligence: Power BI, Tableau, Power Query, Data Analysis, Data Visualization, KPI Reporting
- AI & LLM Technologies: Large Language Models (LLMs), Ollama, Qwen 2.5, Claude, AI Tools, AI Chatbot Integration
- Data Engineering & Big Data: Apache Hadoop, Google BigQuery, Data Processing, Data Transformation
- API & Platform Integration: Meta Marketing API, API-Based Data Extraction, Windsor.ai, Data Source Integration, Marketing Analytics
- Dashboard & Web Development: Antigravity IDE, Interactive 3D Dashboard Development, Website Development, AI-Powered Analytics Dashboards

WORK EXPERIENCE WITH 3 COMPANY

1.AI-PoweredMarketing AnalyticsDashboard
Technologies: Meta API, Power Query, Power BI, Windsor.ai, Claude, AI Chatbot Integration
Integrated marketing data sources to retrieve campaign and advertising performance data through APIs.
Extracted and analyzed marketing metrics, including ad spend, leads, cost per lead (CPL), and campaign performance.
Used Power Query for data cleaning, transformation, and preparation.
Worked on AI chatbot integration using Claude and Windsor.ai to support natural-language data queries.
Developed analytics dashboards and reports to present marketing insights and support data-driven decisions.

2. Local LLM-Based AI Data Analyst
Technologies: Ollama, Qwen 2.5, LLMs, Python, Data Analytics
Set up and tested local large language models using Ollama and Qwen 2.5.
Worked on connecting AI models with data analysis workflows.
Explored natural-language querying of datasets to retrieve analytical insights.
Worked on an AI data analyst dashboard concept for answering questions about business metrics.

3. Interactive 3D Analytics Dashboard
Technologies: Antigravity IDE, AI Tools, Dashboard Development, Data Visualization
Worked on developing interactive dashboard interfaces with 3D visual elements.
Explored AI-assisted dashboard development and data visualization.
Designed dashboard concepts for presenting KPIs and business analytics in an interactive format.

4. Business Intelligence & Big Data Analytics
Technologies: Power BI, Tableau, Power Query, Google BigQuery, Apache Hadoop
Worked with BI tools to analyze data and present business insights through visual reports.
Used Power Query for data preparation and transformation.
Explored cloud-based data querying and big-data processing workflows using BigQuery and Apache Hadoop.

5. API-Based Data Analytics & Website Development
Technologies: APIs, Meta Platform Integration, AI Tools, Website Development
Worked on retrieving platform data using API credentials and connected data sources.
Used extracted datasets for analysis, reporting, and dashboard visualization.
Worked on developing websites and integrating data-driven functionality into web interfaces.
